      UI/UX Developer

2.Indian Services   3 months

      Cyber security(Virtual internship)

Project Tittle : Detection Of Fake News Using Logistic Regression

The objective of our research is to develop a robust system for the automatic detection of fake news using advanced machine learning techniques .This entails leveraging the capabilities of machine learning, particularly algorithms such as ensemble learning to analyze new articles and classify them as either genuine or deceptive. Our system aims to accurately identify and categorize misleading or fabricated information and provide genuine information to the users.
